

THE SAFETY MANAGEMENT SYSTEM THAT IS BOTH
COMPREHENSIVE AND EASY TO USE.

Foreword

Online WHS is the most comprehensive and easy to use system on the market and that's not just what we think. The following presentation is a combination of:

- Why Online WHS
- Our Clients
- Testimonials
- The major features complete with video links
- How cost effective we are compared to our competitors

Why Online WHS?

Online WHS makes Safety

Accessible

- The system is online, it doesn't matter if you're working on site or across the globe you can manage safety and make sure things are getting done.
- QR Codes make elements of the system quickly accessible, further you can make certain elements public.

Easy

- The system is designed to be used by all team members from HR guru to truck driver.
- All a standard user needs to do is log in and action their '*to do list*'.
- The user sees only information relevant to the site they work in – so a child care worker won't see data relating to the depot.

Automated

- Generate reports which would typically take days, weeks and months to create at the click of a button.
- Schedule tasks to be repeated on a regular basis.
- Reduce time needed to prepare for an Audit by up to three months.

We're Easy to Use.

We believe safety is everyone's responsibility

Online WHS

- Designed to be used by any team member, regardless of training and background.
- Every employee has access to the System.
- Each section is easy to complete. Users follow clear step-by-step prompts.
- Trained agents located across Australia are able to assist and support clients.
- Designed with on-page help, help sections, training modules and direct ways to contact.

Our Competitors

- Typically designed for either WHS or IT professionals.
- Typically only a handful of people have access.
- Typically users require prior knowledge of processes and training on the system.
- Typically provide limited support that is usually quite expensive.
- Typically charge extra and don't provide support.

We're Comprehensive. We believe all areas of safety should work together.

Online WHS

- We have 22 modules working together to streamline quality and WHS.
- All clients get full access to all modules. There are no hidden modules or costs.
- Data moves freely between modules and processes are automated to save time and preserve data integrity.
- Additional features have been developed based upon client feedback.

Our Competitors

- Few competitors cover the range of aspects of safety that we cover.
- Typically there are additional costs per module, and all team members do not access the system.
- Data is isolated and mismatches of information may occur.
- Typically if functionality doesn't exist there are no avenues to suggest an upgrader.

We're Cost Efficient. We believe that cost should not be a barrier to safety.

Online WHS

- For a recent large business tender, our price came in at a ¼ of the price from the nearest competitor.
- When a potential client MBC Recruitment looked at our suite they found they would save \$30k per year on what they were paying for their E-Learning ALONE.
- There are no extra charges for support. Our online support and online training is included in the subscription fee.

Our Competitors

- In that same tender, the only competitor offering a solution as complete as ours was MYOSH. Their price was over \$80k ours was under \$20k.
- E-Learning solutions cost around \$10 per test induction. Companies with 100 employees undertaking 10 inductions would cost \$10k p.a.
- Many competitors charge for support, documentation, and online training.

Our Customers

The next few slides showcase some Online WHS clients.

Some of our Clients

Existing Customer Markets

Councils / Government

Manufacturing Companies

Companies with a warehouse

Transport or Deliveries

Aged Care / Nursing Homes/ Child Care

Trade Businesses (EG Electrical, Builders)

Service Business

Car Dealerships

Franchises

Caravan Parks / Sports Facilities

Universities + Education

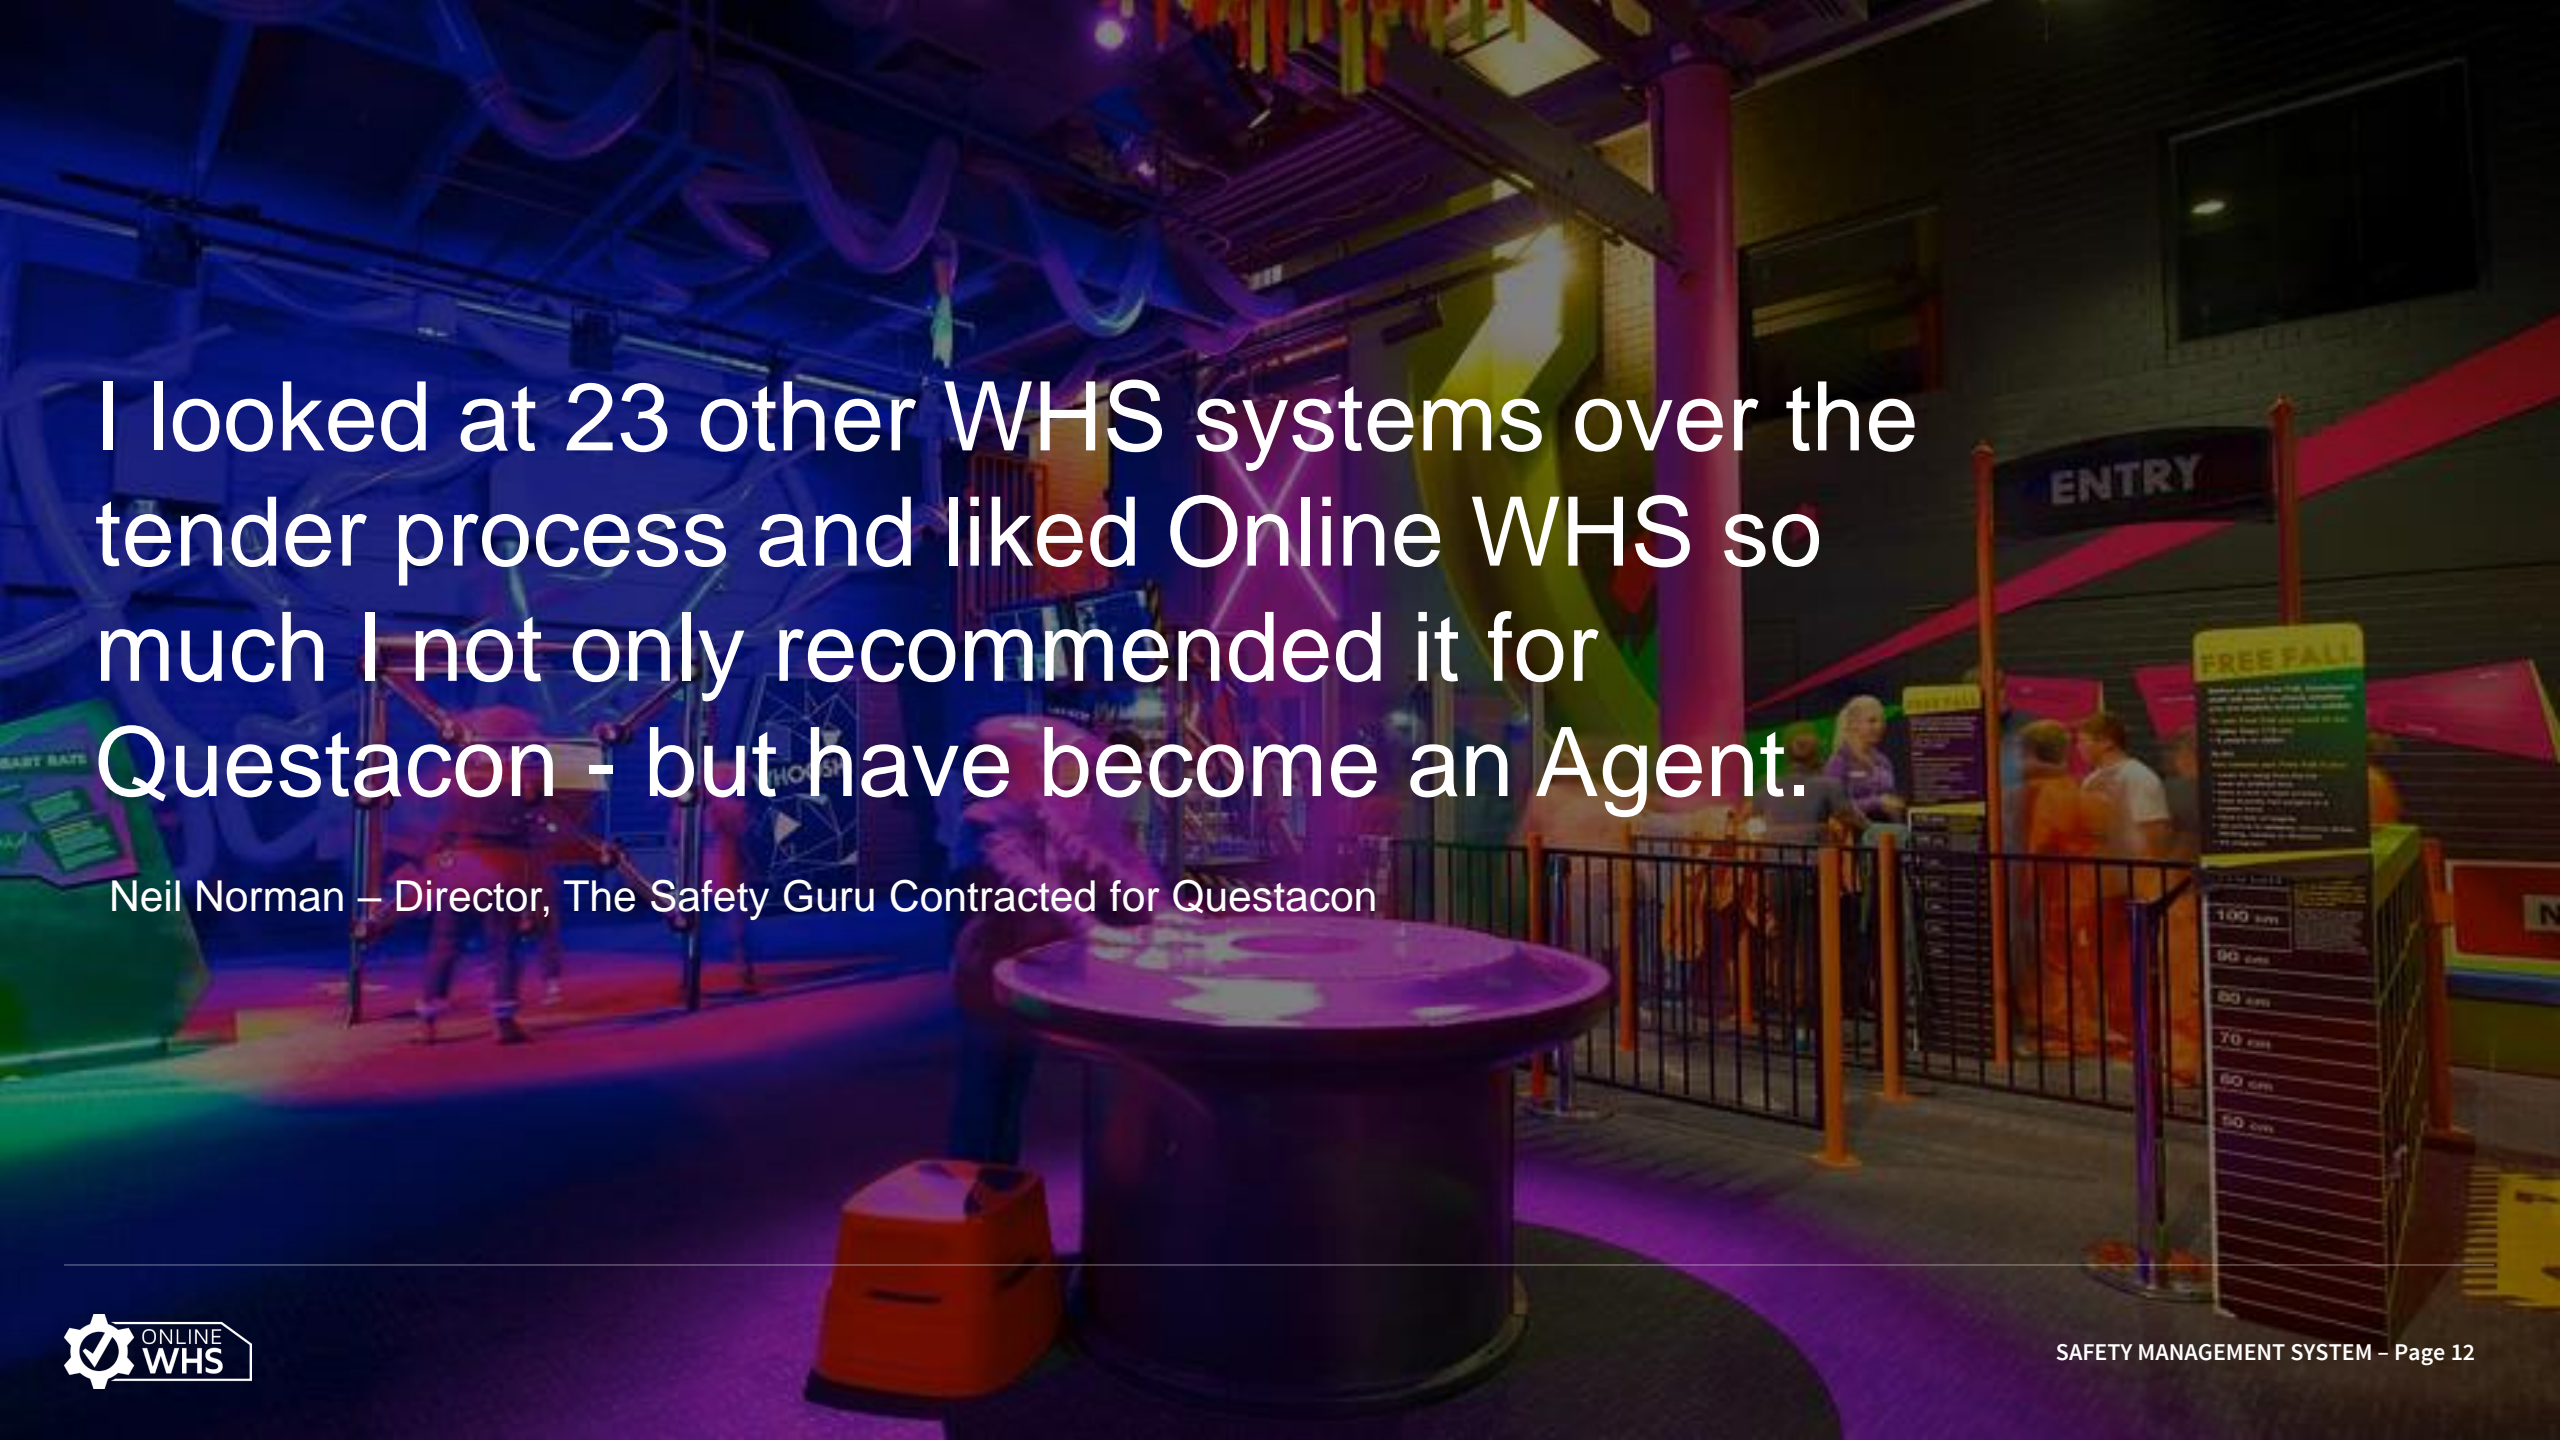

Racecourses / Clubs / Pubs

What our Customers are saying

The next few slides highlight some testimonials from our clients.

I looked at 23 other WHS systems over the tender process and liked Online WHS so much I not only recommended it for Questacon - but have become an Agent.

Neil Norman – Director, The Safety Guru Contracted for Questacon

2014 ONLINE WHS WINS WILLOUGHBY COUNCIL TENDER OVER 17 MAJOR WHS SYSTEMS

“I’ve looked at all the other systems Phil, and yours was the best by far! I’ve just got to have it.”

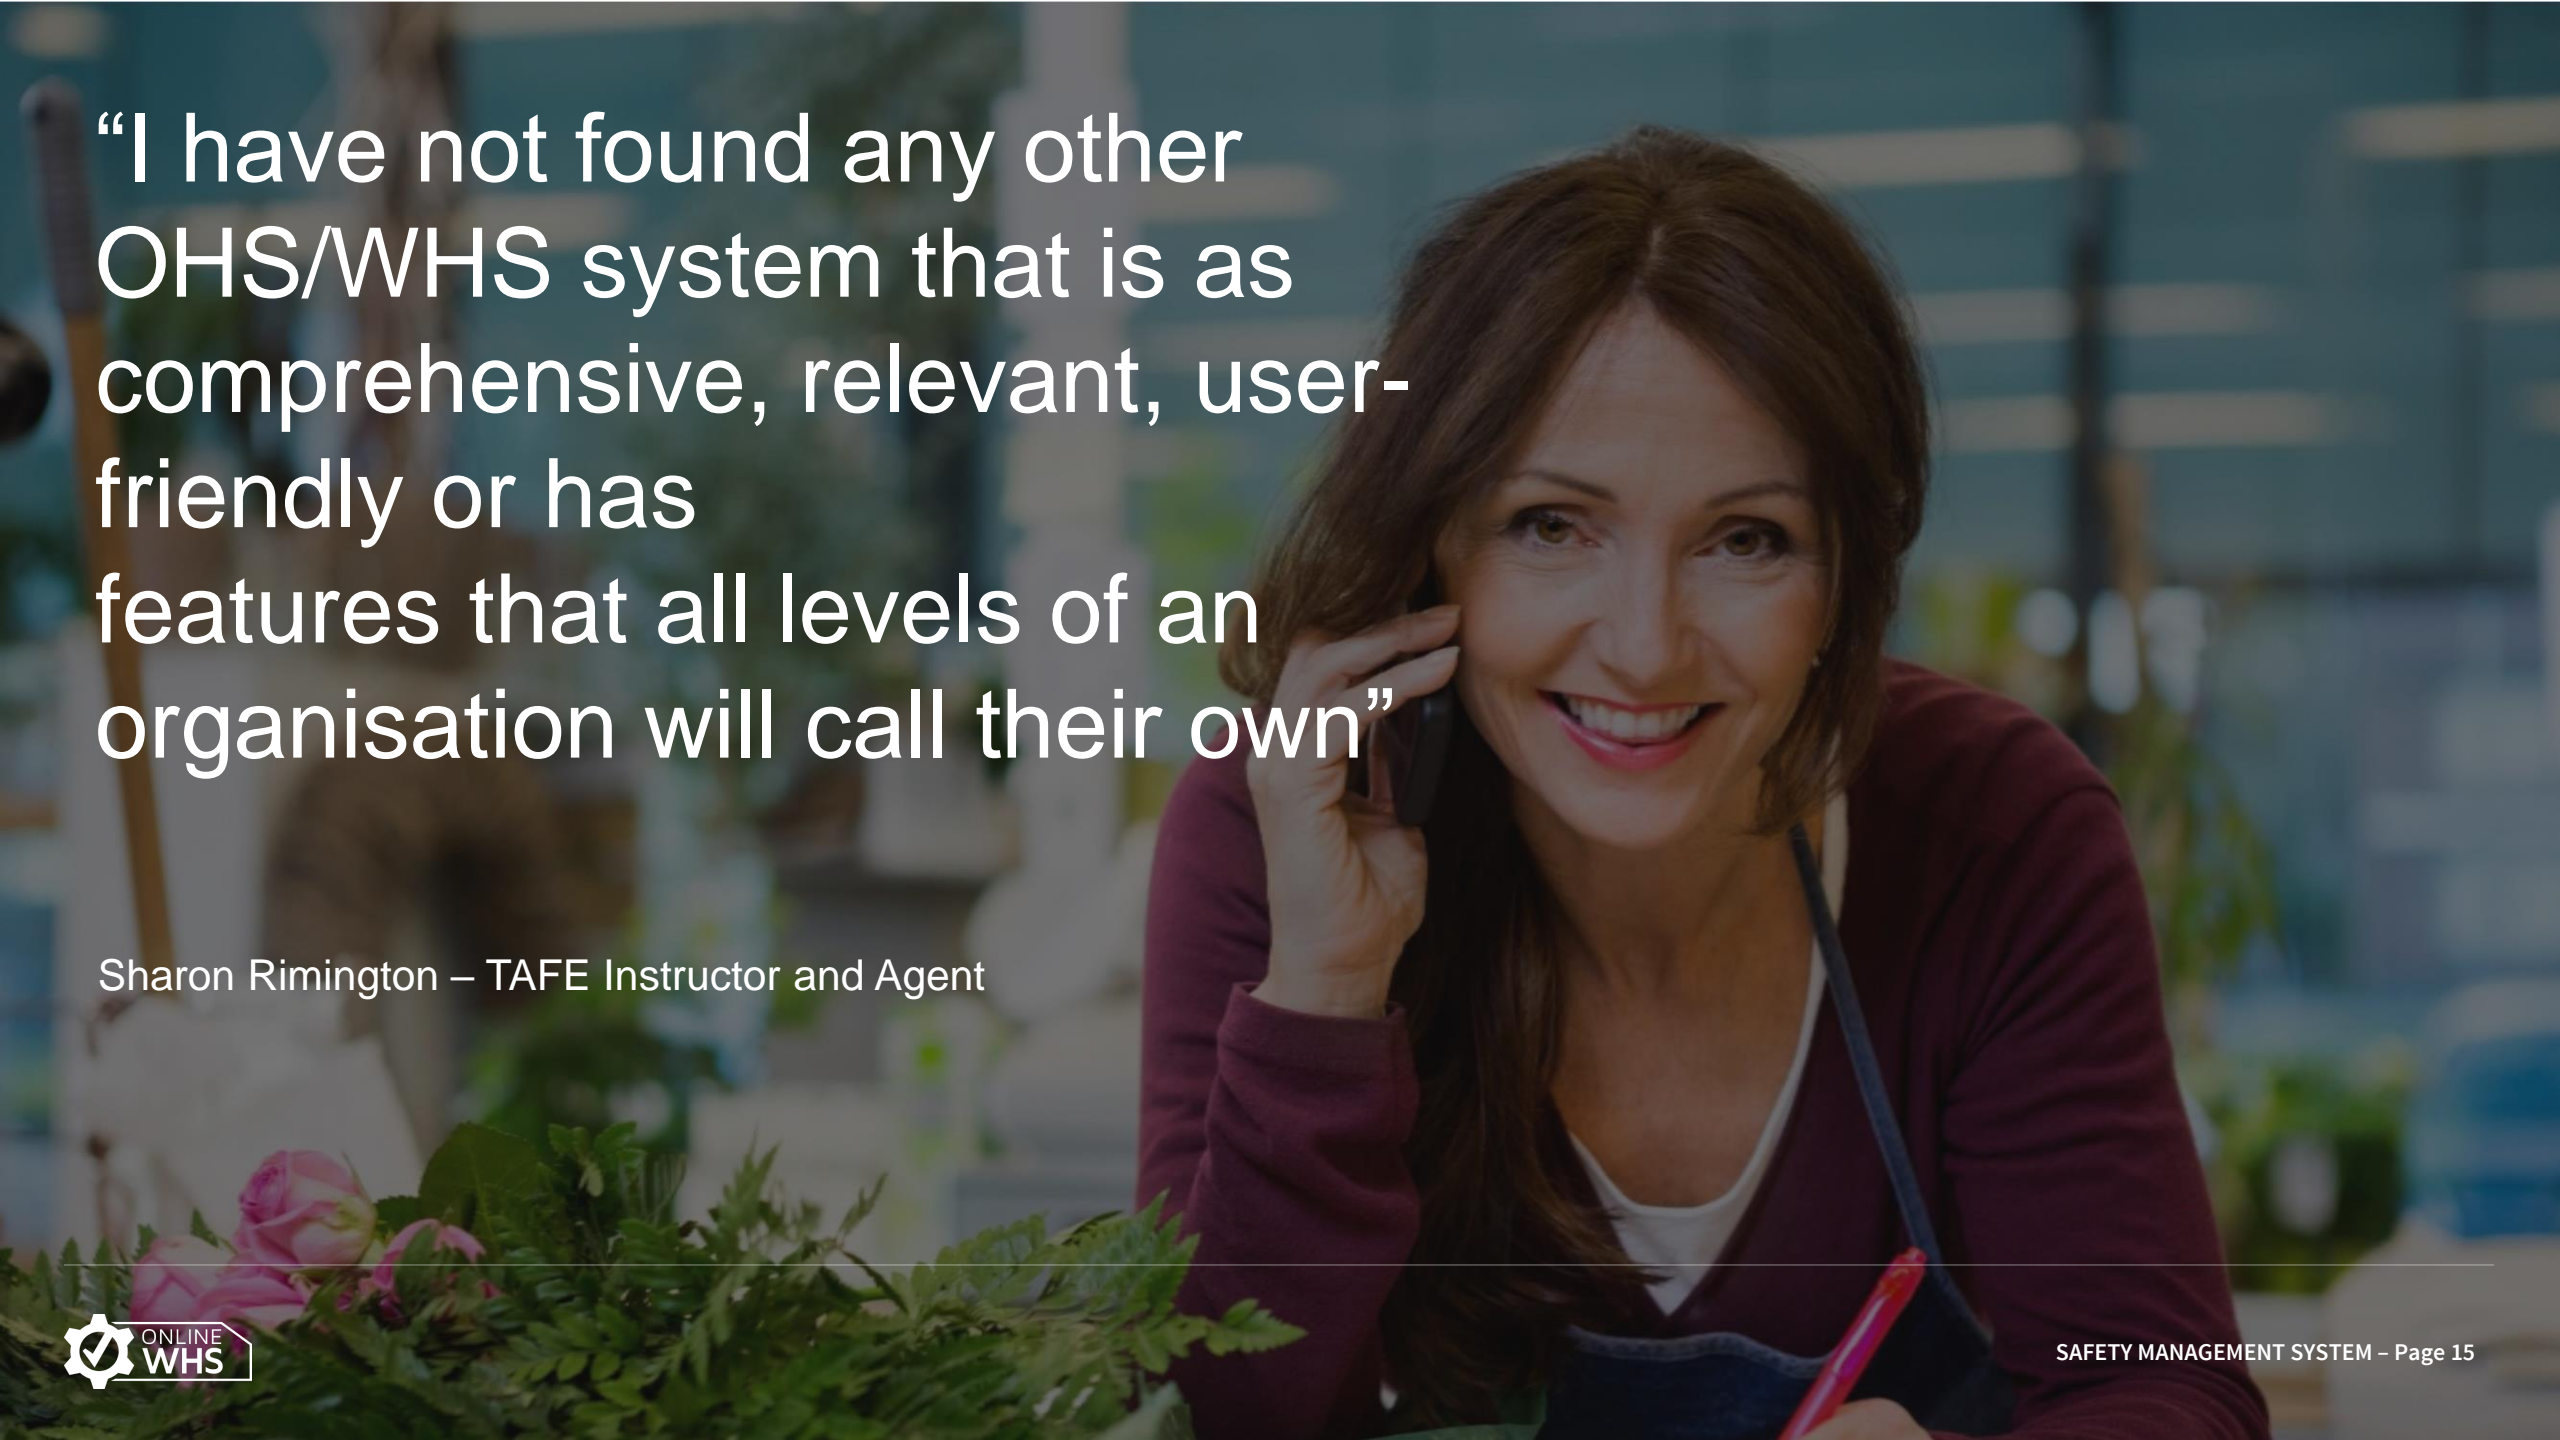

Christine Davis – Strategic Human Resources Manager, Willoughby Council

FALLS CREEK SNOW RESORT

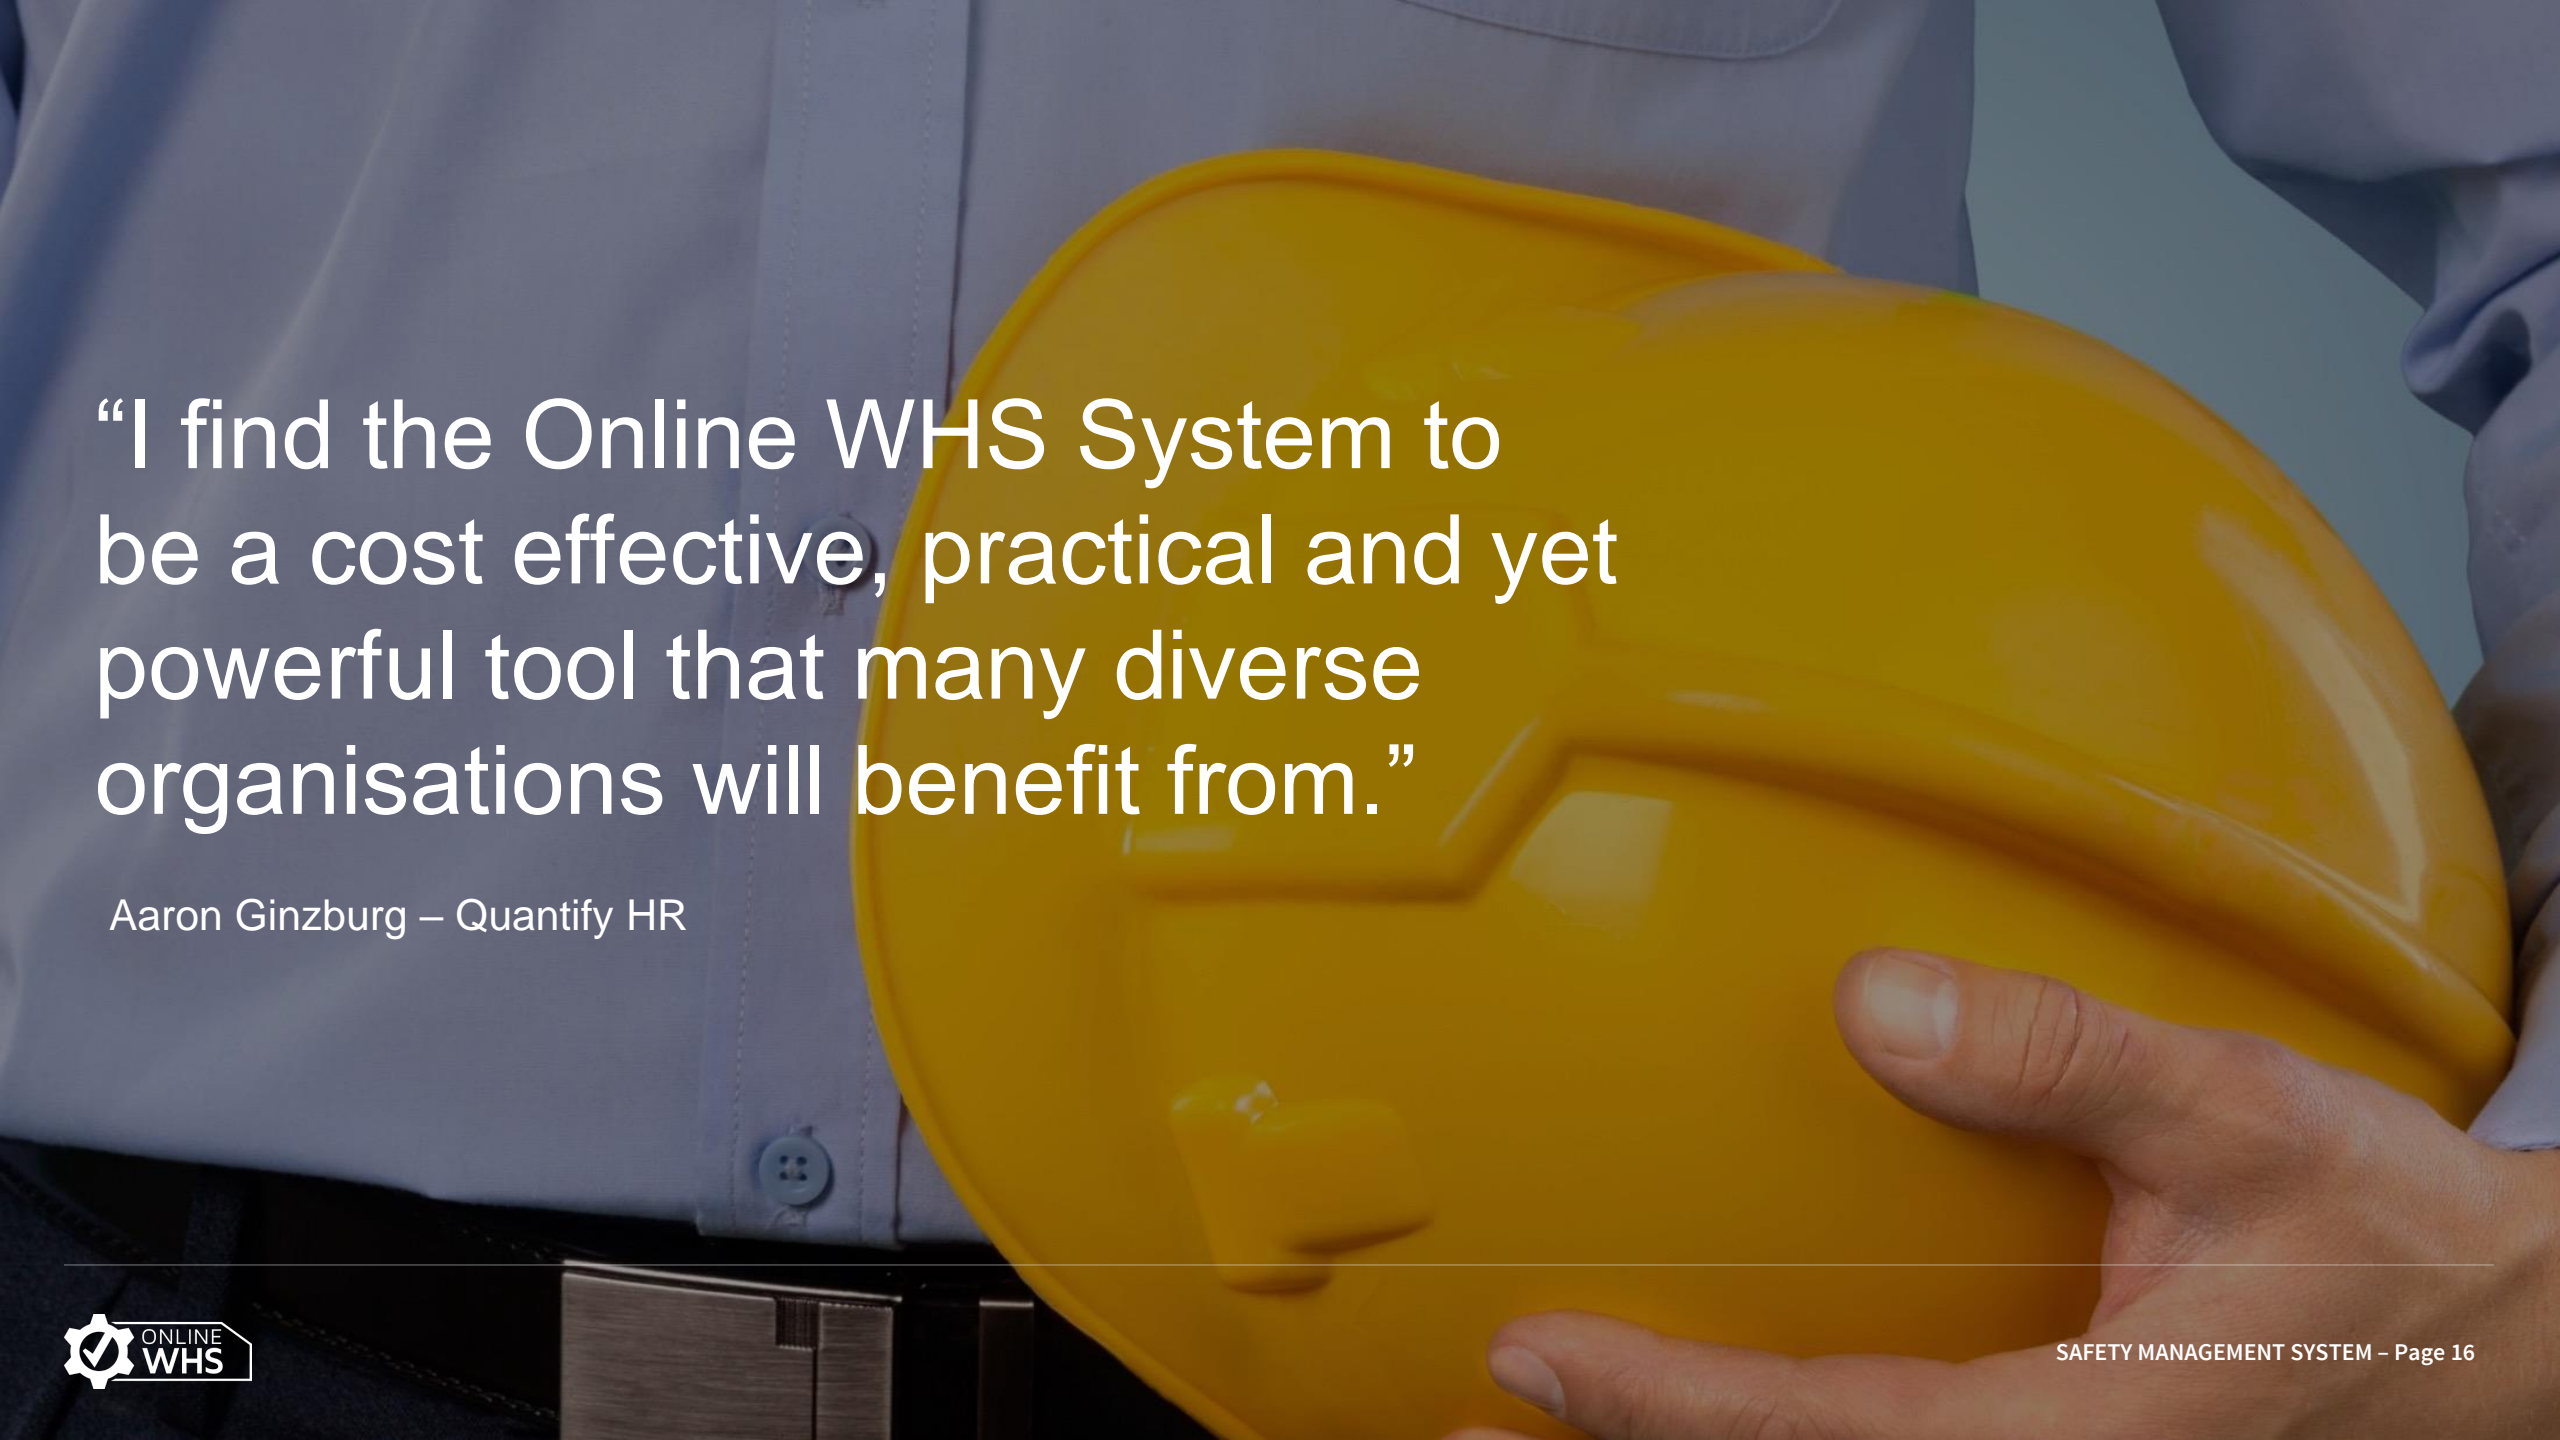

“It has made keeping track of all my WHS issues very easy, as it is all in the one place. It has also helped the work crew take more ownership of WHS responsibilities.”

Paul Mason – Supply and Risk Coordinator, Falls Creek Resort

“I have not found any other
OHS/WHS system that is as
comprehensive, relevant, user-
friendly or has
features that all levels of an
organisation will call their own”

Sharon Rimington – TAFE Instructor and Agent

A person wearing a light blue button-down shirt is holding a bright yellow hard hat. The hard hat is positioned in the foreground, partially obscuring the person's torso. The background is a soft, out-of-focus blue.

“I find the Online WHS System to be a cost effective, practical and yet powerful tool that many diverse organisations will benefit from.”

Aaron Ginzburg – Quantify HR

Major Features that make Online WHS a must have!

The next few slides highlight some of the new major features that you should be using in your Online WHS system.

Before we get started

Some of the following slides are interactive using QR Codes to make the end users experience easy. So before we get started please follow these simple steps and download a QR Code Reader (if you do not already have one on your phone).

How To Download a QR Code Reader To Your Mobile Device

To download QR code software for your mobile phone, simply follow these steps:

1. Open your mobile app store (App Store, Google Play, Windows Marketplace, etc.)
2. Search for QR code readers.
3. Simply download the QR code reader to your phone, open it and you are ready to go.

Major Features that make Online WHS a must have!

1) Training Needs Analysis

Online WHS will save your business time and money by automatically creating a training needs analysis.

By simply defining your organisations positions and the qualifications/inductions needed to safely perform that role, when an employee is related to that position the Online WHS system will automatically create an exportable Training Needs Analysis highlighting if any gaps are present in your training.

The screenshot displays the 'Employee Qualification Matrix' interface. It features a search bar at the top with a 'Go' button and a 'Back' link. The main table lists employees and their qualifications. The legend indicates that yellow cells represent 'Qualification Needs Analysis', green checkmarks represent 'Assigned Qualification', red 'D' symbols represent 'Alert date passed', and red 'E' symbols represent 'Qualification Expired'.

Employee(s)	Qualification(s)											
	Cert II Electrical	Cert IV Electrcav	Cert III WHS	Cert IV WHS	Confined Spaces	Drivers Licence	Excavator licence	Forklift Licence	Provide First Aid	Senior First Aid	White Card	Working at Heights

Major Features that make Online WHS a must have!

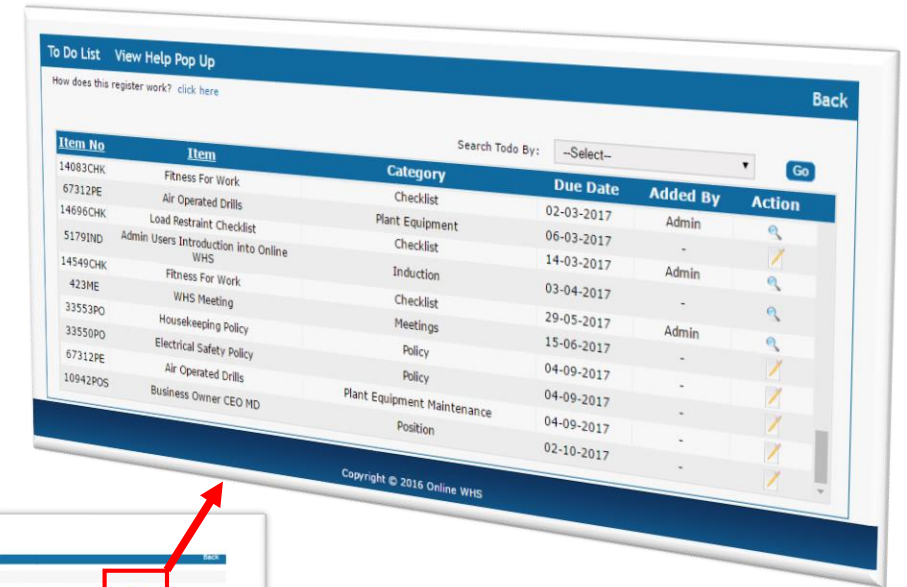

2) The To Do List

Online WHS is made with the end user in mind with its To Do Lists. Simply put each team member only needs to go to one place and select ONE icon to see exactly what they need to do that day!

Your team will always know what to do and when to do it, and if they haven't done it then the manager is notified.

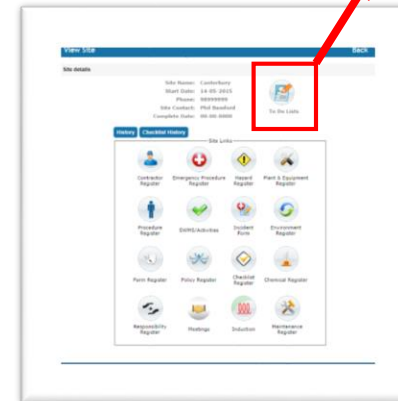

You can program items throughout the system i.e. Checklists, inductions, reviews etc. via the To Do List master to be undertaken daily, weekly, monthly, quarterly, six monthly and yearly.

So set and forget!

The screenshot shows the 'To Do List' interface with a search bar and a table of tasks. The table has columns for Item No, Item, Category, Due Date, Added By, and Action. The tasks listed include Fitness For Work, Air Operated Drills, Load Restraint Checklist, Admin Users Introduction into Online WHS, Housekeeping Policy, Electrical Safety Policy, and Business Owner CEO MD.

Item No	Item	Category	Due Date	Added By	Action
14083CHK	Fitness For Work	Checklist	02-03-2017	Admin	
67312PE	Air Operated Drills	Plant Equipment	06-03-2017	-

10942POS	Business Owner CEO MD	Position		-	

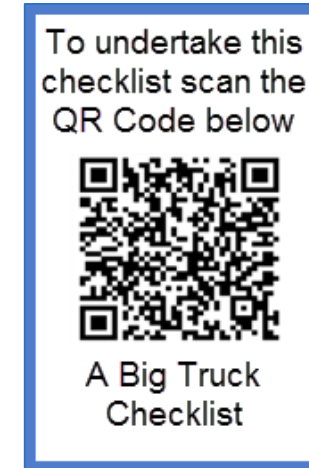

Major Features that make Online WHS a must have!

3) Checklist Builder

Checklists are a fundamental part of safety and compliance. You can create a series of online custom checklists and assign them to be completed by a certain date using the Online WHS checklist builder.

- Relate the checklist to items in your system such as sites, activities, machines, chemicals, compliances, policies, employees, contractors and more.
- The developed checklist creates its own QR Code, print and stick on a machine, wall or anything needed once scanned the checklist can be undertaken anywhere via any mobile device with an internet connection
- Completed checklists are recorded in a log (of all items it is related to, to show compliance easily and effectively)
- Checklists can be scheduled to be completed on a reoccurring basis by a specific position, team or location.

Scan the QR Code on the form above and complete the maintenance request form on your phone and see that even without being logged into the system you can complete the form.

A screenshot of a web application interface for creating checklists. It shows a form titled 'GOLF CART RETURN CHECKLIST' with various fields for completion. A QR code is visible on the right side of the form. The interface includes a sidebar with navigation options like 'Site', 'Activity', 'Machine', etc. At the bottom, there's a table showing a log of completed checklists with columns for 'Action', 'Performed by', 'Performed on', and 'Download'.

Major Features that make Online WHS a must have!

4) The Maintenance Manager

Online WHS allows you to develop a maintenance request form for a site, location or plant and equipment item.

Once developed, the system creates a QR Code that you can attach to the site or piece of equipment.

- An employee or public user can scan the QR Code
- The person completes a basic form which then sends the maintenance request to the maintenance register complete with work order number and also alerts the person made responsible
- The person responsible can then select either an internal person or a contractor (from the contractor management section in Online WHS) to undertake the work.

Maintenance made easy.

Scan the QR Code on the form above and complete the maintenance request form on your phone and see that even without being logged into the system you can complete the form.

Item ID	Site	Maintenance	Work Order	Start Date	End Date	Maintenance Cost Date	Location	Needs Approval	Status	Action
220448	Canterbury	Warden not working	Can235	N/A	N/A		Power	No	Not Assigned

Major Features that make Online WHS a must have!

5) The Audit Builder

Audits are a big part of showing compliance, so instead of having papers all over your desk relating one document to the other, why not just use the data in your Online WHS and link it to the audit you created in the system as well. No more paper!

The Online WHS allows you to:

1. Build an Audit in the system
2. Relate documents and data throughout your Online WHS system to the audit you created to show evidence
3. Allows the auditor to easily audit your evidence, and enter observations and recommendations, to produce exportable report.

Major Features that make Online WHS a must have!

6) The Online E-Learning Module

Create your own online e-learning modules!

Assign the induction or training modules to an employee, position or qualification.

Record all results in each individual employee history complete with exportable reports.

Major Features that make Online WHS a must have!

7) The Incident Register with Reports

Online WHS produces detailed incident reports on incidents recorded in your system.

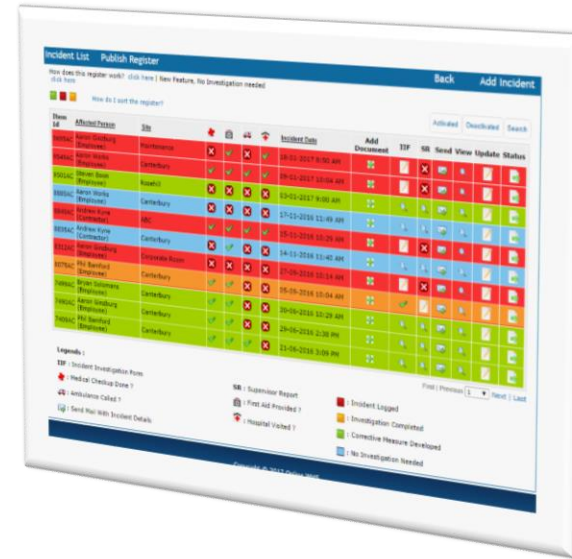

Undertaken an investigation and develop corrective measures.

Assign actions to ensure corrective actions are implemented.

Develop reports to identify true causes and trends.

Scan the QR Code to complete the incident form. Imagine exporting the QR Code and placing it throughout your facility, logging incidents has never been this easy!

The incident is logged into the Incident register an auto alerts the person/s responsible.

Detailed reports can be generated to identify trends and reduce the likelihood of reoccurrence.

Major Features that make Online WHS a must have!

8) Contractor Management

Ensure your contractors have the appropriate:

- Qualifications
- Safe Work Documents and Procedures
- Insurances

Online WHS Contractor Management portal:

- Creates Contractor ID Card complete with photo.
- Uses QR Codes to highlight if the company is up to date with insurances.
- Alerts the contractor on expiring insurances.
- The contractors, their employees and sub contractors can complete inductions online prior to commencing work on site.

The screenshot displays the 'Contractor Form' interface, specifically the 'INSURANCES' tab. The form is titled 'INSURANCES' and includes a red note: 'Fields marked * are mandatory'. It asks, 'Does your organisation have required insurances and permits? Provide EXPIRY DATES in boxes below:'. The form contains several sections for different types of insurance and permits, each with 'Alert Date' and 'Expiry Date' fields (all set to 01-09-2020) and an 'Attach copy' button. The sections are: Workers Compensation, Public Liability, Professional indemnity, and Required permits. Below these is a question: 'Has the company ever been convicted of a safety offence?'. At the bottom, there are 'Save Insurances' and 'Cancel' buttons. The footer of the form indicates 'Copyright © 2016 Online WHS'.

Major Features that make Online WHS a must have!

9) Hazards Management

This easy to use Hazard Management section allows you to:

- Log a hazard
- Assess the hazard
- Develop control measures
- Assign actions to implement the control measures
- Develop alerts for each process
- Develop reports to identify trends.

The Corporate Risk Management module is coming March 2017.

A screenshot of the Hazard Management interface. It shows a table with columns: Item ID, Hazard Name, Site, Activity, Machine, Assessed, Controlled, Signed, Download Hazard Document, Hazard Document, Hazard Review Date, View, Edit, and Status. The table contains several rows of hazard data, each with a colored status indicator (red, yellow, or green) in the first column. The interface also includes a search bar and a "How does this register work?" link.

Scan the QR Code on the form above and complete the maintenance request form on your phone and see that even without being logged into the system you can complete the form.

Major Features that make Online WHS a must have!

10) Return to Work

This new module will allow you to develop a Return To Work plan with:

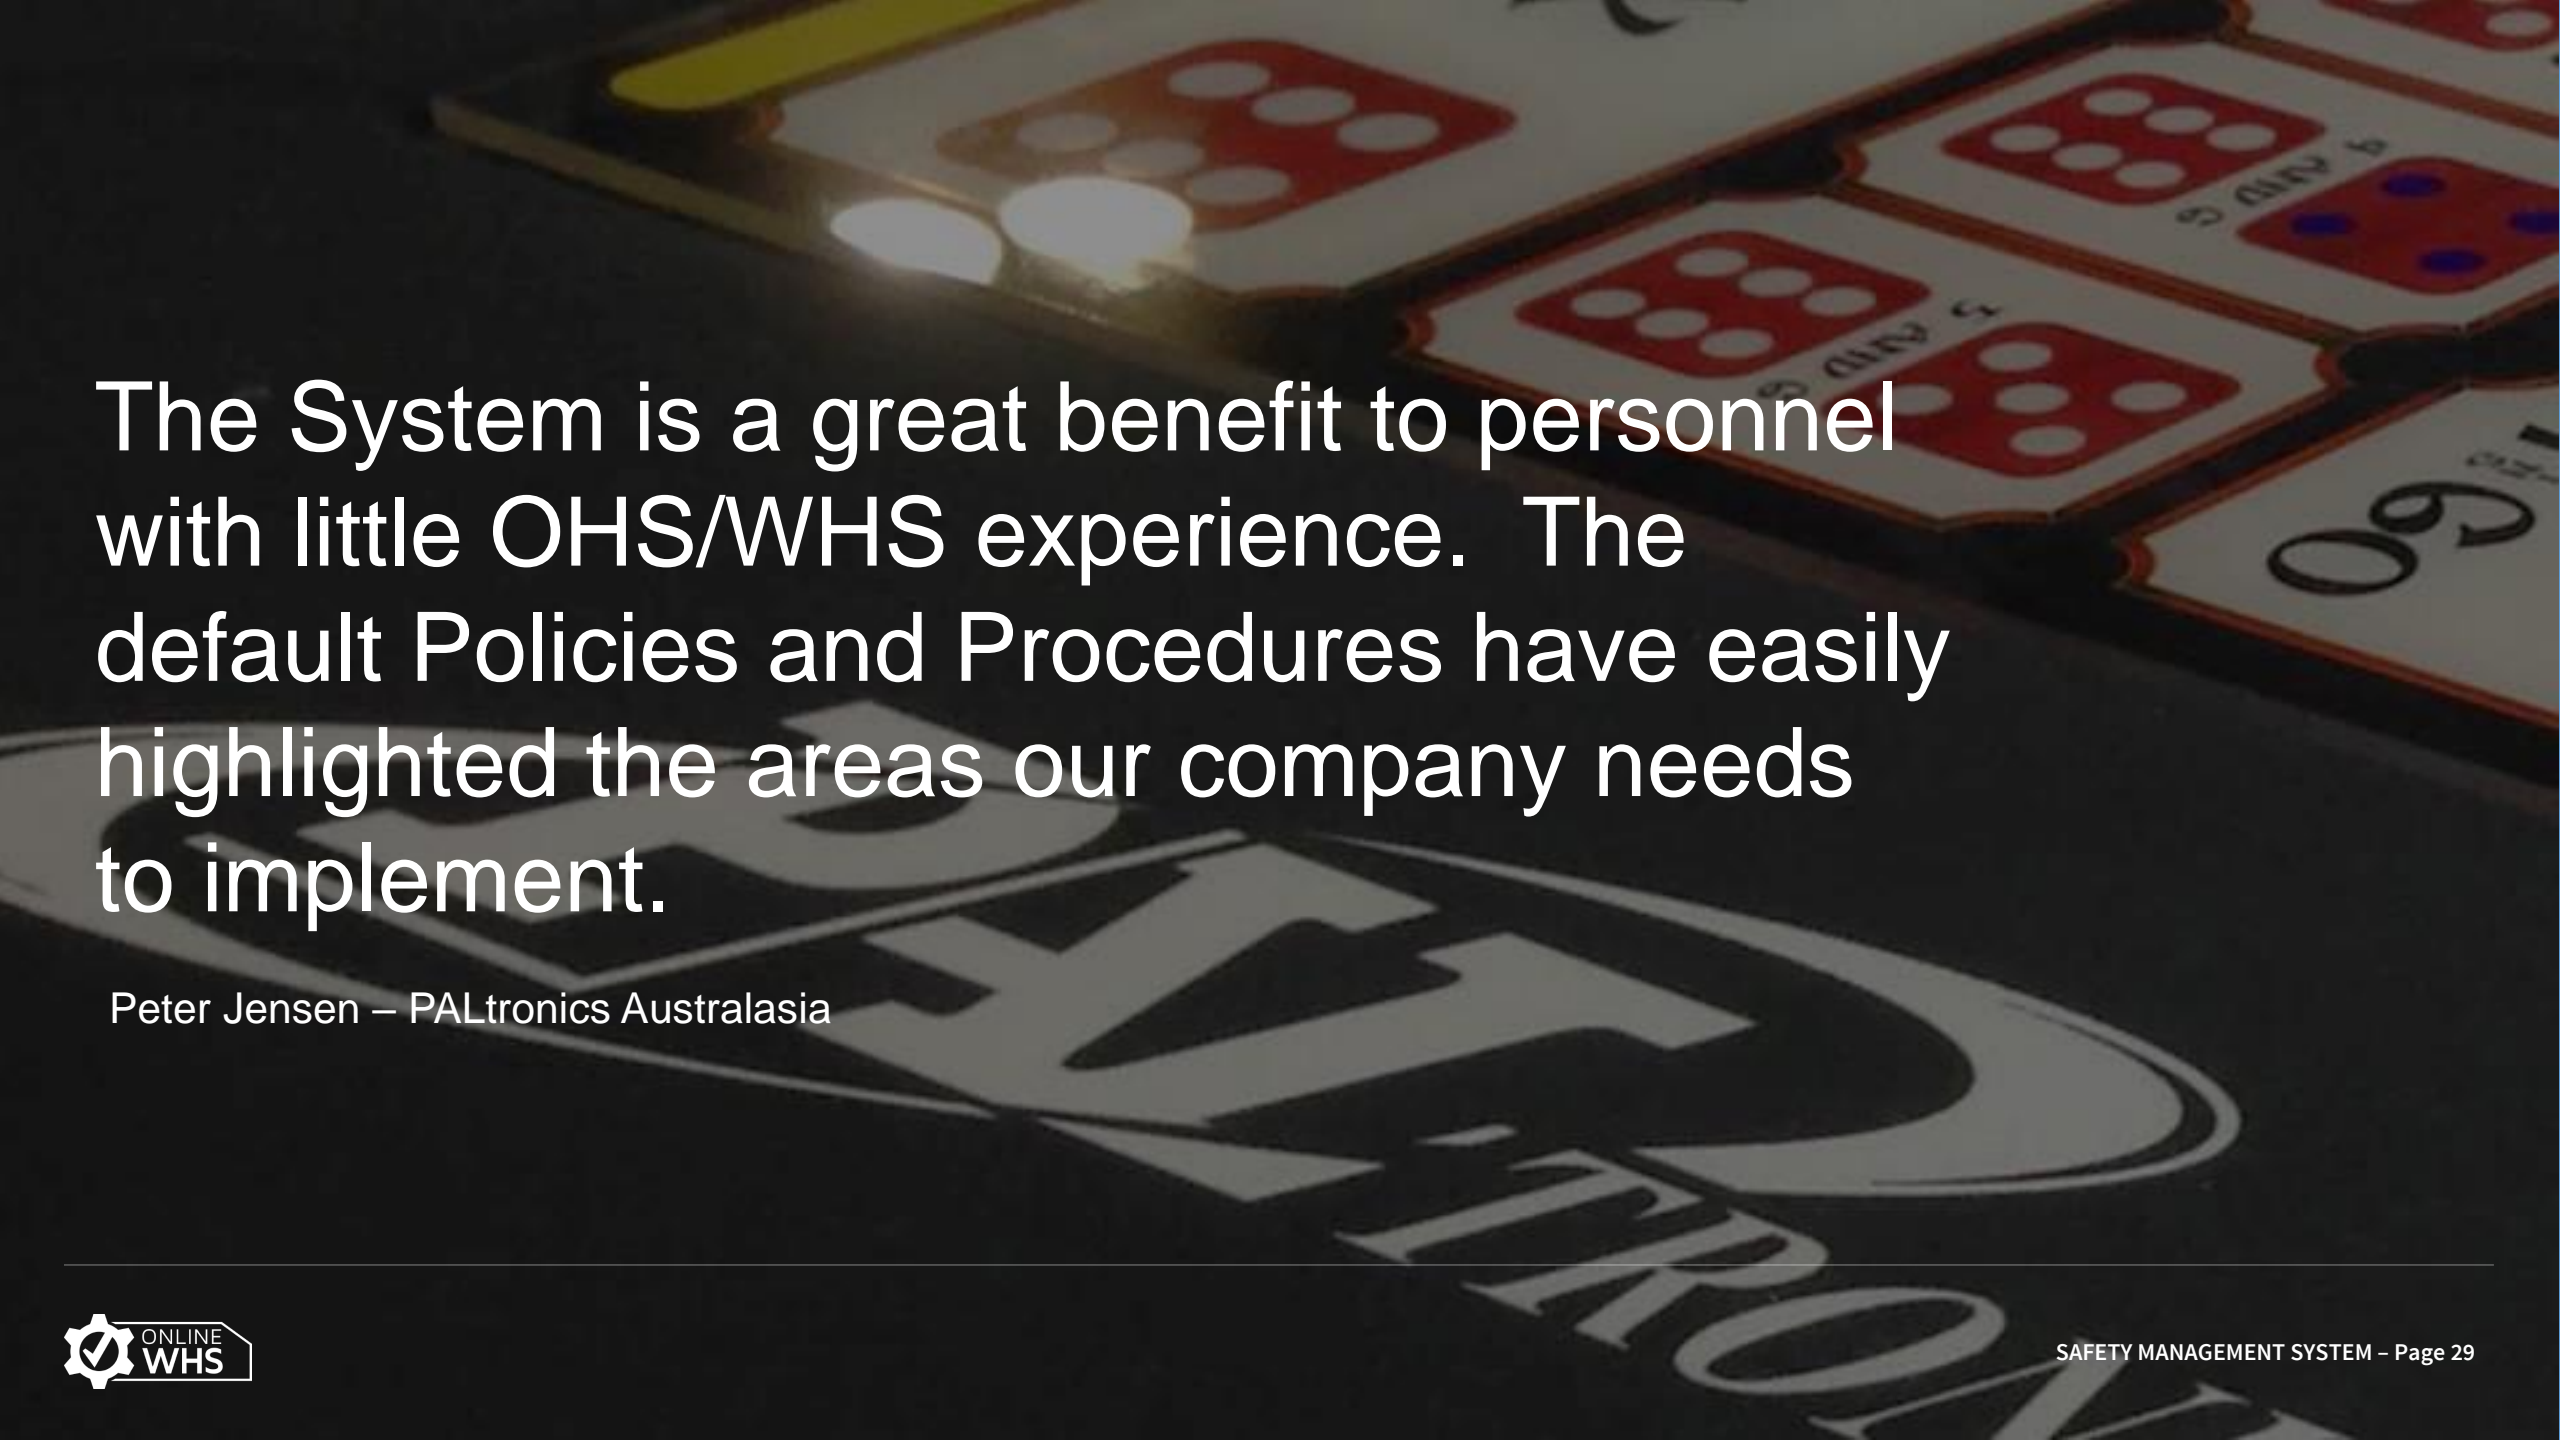

- Normal or reduced hours
- Duties
- Duties to be avoided
- Goals
- Workplace Modifications
- Considerations
- Actions

Also develop reports and calculate reduce hour wages.

The screenshot displays the 'Return to Work' form within the Online WHS system. The form is titled 'Return to Work' and includes a 'Back' button in the top right corner. It contains several sections for data entry:

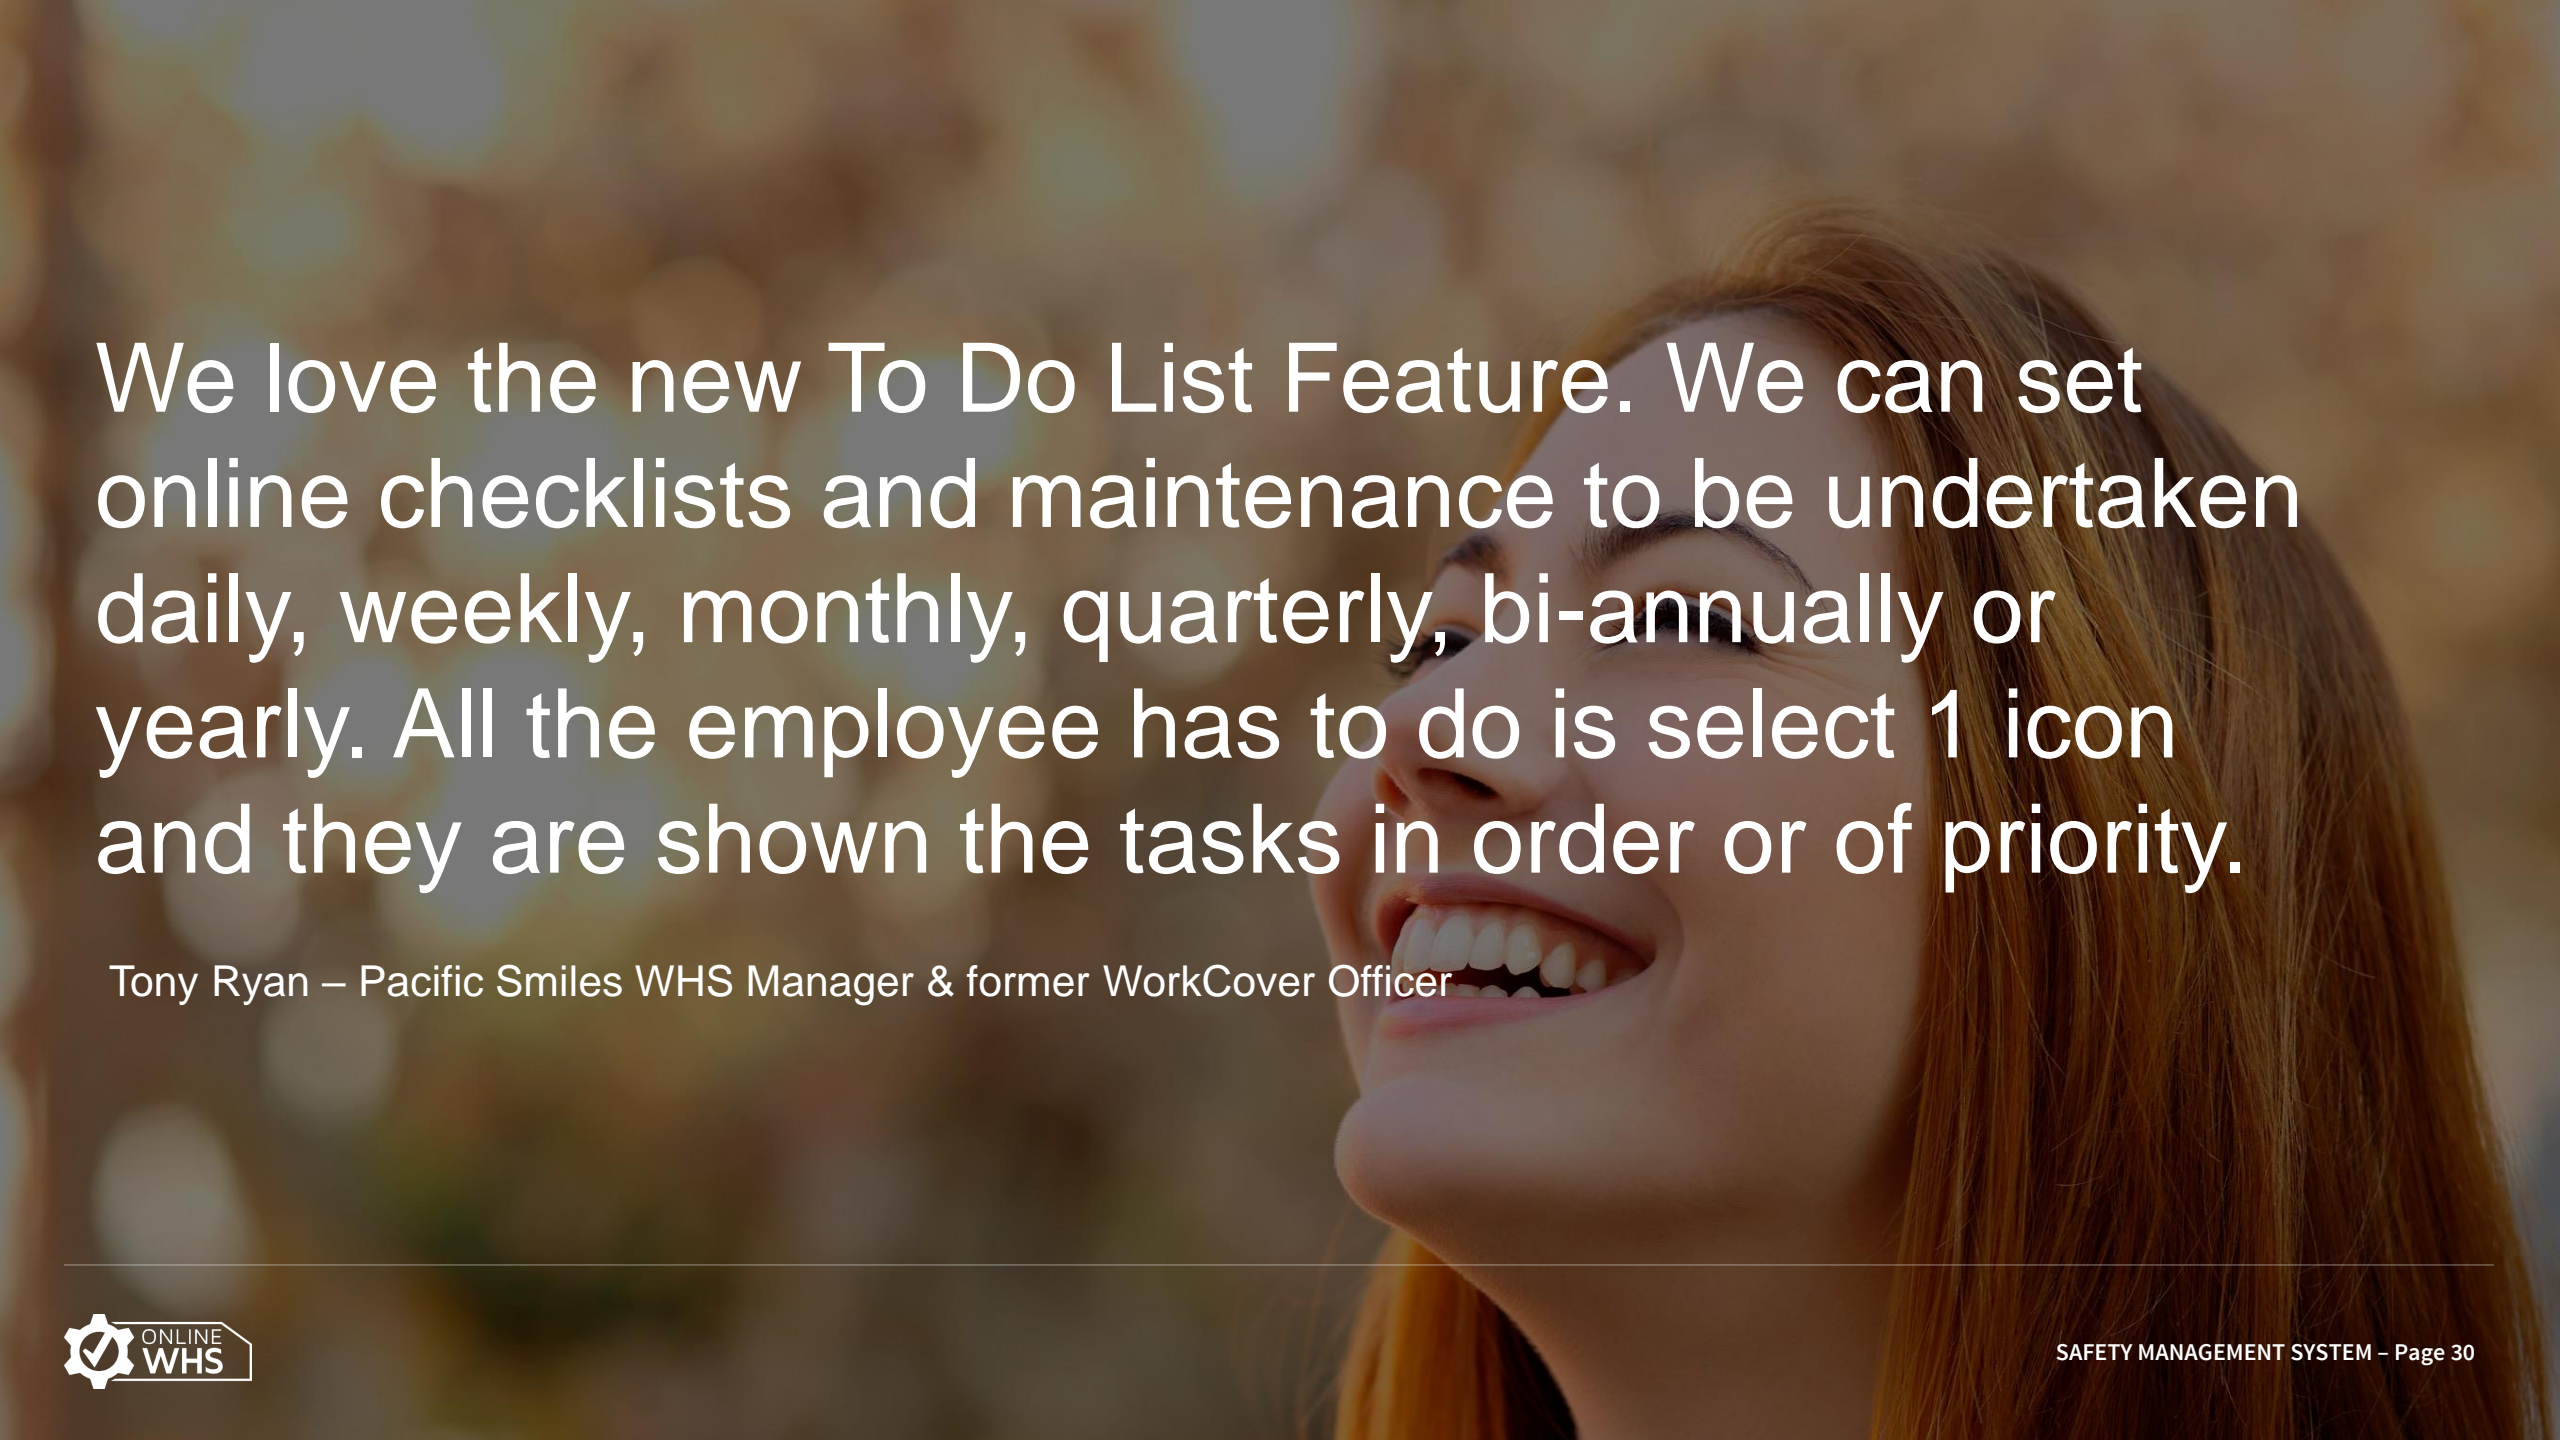

- Employee Information:** Name of Person (Graham Cook [Employee]), Position before injury (position1), Name of Supervisor, Injury Date (01-03-2016 03:27:00), and a checkbox for 'Does the Employee need off work?' (Yes/No).
- Rehabilitation Goals:** A text field for 'Rehabilitation Goals As agreed by doctor/nurse and employer'.
- Current Whole Person Impairment Percentage:** A dropdown menu set to 'less than 10%' and a date field.
- Return to Work Plan:** A section with tabs for 'Same Employer/Same Job', 'Same Employer/Different Job', 'Different Employer/Similar Job', and 'Different Employer/Different Job'. It includes fields for 'Start Date' (2017-01-25), 'Time Start' (09:00), 'Time Finish' (14:00), 'Days of Work' (Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday), and 'Hours' (15:00).
- Duties and Goals:** Two columns for 'Duties' and 'Duties to be avoided' with dropdown menus, and a 'Goal' field.
- Workplace Modifications and Considerations:** Text areas for 'Any work place modifications' and 'Considerations'.
- Action Items:** A section for 'Action Items' with a 'Person Responsible' dropdown and a 'Due Date' field.
- Review:** A section for 'Review' with a 'Whole Person Impairment percentage after review' dropdown, a 'Name of person undertake review' dropdown, and a 'Date of Review' field (1970-01-01).
- Return Date and Completed Date:** Fields for 'Return Date' and 'Completed Date'.

The form concludes with a 'Save' button and a copyright notice 'Copyright © 2017 Online WHS'.

The System is a great benefit to personnel with little OHS/WHS experience. The default Policies and Procedures have easily highlighted the areas our company needs to implement.

Peter Jensen – PALtronics Australasia

We love the new To Do List Feature. We can set online checklists and maintenance to be undertaken daily, weekly, monthly, quarterly, bi-annually or yearly. All the employee has to do is select 1 icon and they are shown the tasks in order or of priority.

Tony Ryan – Pacific Smiles WHS Manager & former WorkCover Officer

Thank you for your interest in the Online WHS System.

We look forward to potentially working with you to deliver value for your clients.

Please feel free to contact me for any reason.
